

**Where does bread come from?**

# Where does bread come from?

---

**Wheat grain  
is planted.**

**The rain and sun help the wheat to grow.**

# Combining

---

**The combine harvester gathers the wheat from the field and then separates the grain from the rest of the wheat plant.**

**The straw is gathered and made into bales.**

**This straw is used for animal bedding.**

**The grain is taken to a mill.**

**Machines 'mill' the grain.**

**It is cleaned, crushed and sieved to make flour.**

**Flour is mixed with other ingredients to make bread.**
